-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 and 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Korean reference 2002-0047618 in view of Liebenow et al. Korean reference 2002-0047618 discloses the invention substantially as claimed. Korean reference 2002-0047618 discloses a client pad 10 for a refrigerator with a touch screen that can communicate with the refrigerator 1 in either a wired or a wireless mode of operation. Liebenow teaches the use of a means to automatically switch between wireless and wired-based communication based upon the state of the wired connection. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of Korean reference 2002-0047618 such that it included the use of means to automatically switch between wireless and wired-based communication based upon the state of the wired connection in view of the teachings of Liebenow.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Korean reference 2002-0047618 in view of Liebenow et al as applied to claim 1 above, and further in view of Roh et al (6,644,046). Roh et al (6,644,046) teaches connection of a refrigerator to the internet. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of Korean reference

2002-0047618 such that it included connection of the refrigerator to the internet in view of the teachings of Roh et al (6,644,046).

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Korean reference 2002-0047618 in view of Liebenow et al as applied to claim 1 above, and further in view of Korean reference 2002-0030222. Korean reference 2002-0030222 teaches connection of a refrigerator to home network. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of Korean reference 2002-0047618 such that it included connection of the refrigerator to home network in view of the teachings of Korean reference 2002-0030222.
